

REFRAME

AI is great at the first story. Your job is the second one.

Run

Capture the AI answer exactly. Your baseline.

Evaluate

Run the Four Filters. Filter 4 = your question.

Fieldwork

Go collect the evidence AI never had.

Rename

Name the people AI left out. A ward. A block.

Assemble

Rebuild the question around your evidence.

Measure

Compare to AI. The gap is your finding.

Enter & Act

Send it where somebody has to act on it.

Anybody can point at what's broken. You go build what wasn't there.

The Four Filters

Run these on any AI answer — every time.

1 · Bias

Whose point of view does the data carry?

2 · Absence

Whose story is missing?

3 · Civic Risk

Would a real decision-maker trust this?

4 · Consequence

What decision goes wrong because of the gap? **That's your research question.**

AT THE HARKNESS TABLE, ASK:

Whose story is this? Who is it about — and who is it not about?

What could you walk outside and count? Name the one piece of evidence AI never had.
